DETAILED ACTION

The finality of the previous office action mailed 5/17/2006 is hereby withdrawn.

This communication is in response to applicant's 08/17/2006 request for pre-appeal conference in the application of **SPEICHER** for "**INTERNET-AUDIOTEXT ELECTRONIC ADVERTISING SYSTEM WITH PSYCHOGRAPHIC PROFILING AND MATCHING**" filed 04/11/2001. The amendment/response to the claims have been entered. No claims have been canceled. No claims have been added. Claims 3-26 are now pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 10-11, 18-19, 26 are rejected under 35 U.S.C. 102(b) as being anticipated by *Lupien* et al. (US 5,689,652), hereinafter *Lupien*.

Regarding claims 3, 11, 19, *Lupien* discloses a method for a computer comprising the steps of:

administering to a first user a first test via the Internet (see col. 5 lines 36-45) where the first test includes presenting a set of at least two visual image to the first user

and receiving the first user's preference based on the visual image (as shown in figure 4, there are many visual images i.e. 50-59, 40-46, etc.);

storing the first user's preferences and generating a profile of the first user according to the visual preferences of the first user (storing the buyer profile in the data base 4, see figure 1);

administering to a second user a second test via the Internet (see figure 4 for seller);

generating a profile of the second user according to the results of the second test (storing the seller profile in the data base 4, see figure 1);

comparing the profile of the first user to the profile of the second user; and
matching the first user with the second user according to visual preferences, whenever the profile of the first user matches the profile of the second user (see col. 4 lines 10-26)

Regarding claims 10, 18, and 26, *Lupien* discloses the matching occurs with a partial match of the first and second's user's preferences (degree of mutual satisfaction, see col. 4 lines 17-26).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2616

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8, 12-16, 20-24, are rejected under 35 U.S.C. 103(a) as being unpatentable over *Lupien*.

Regarding claims 5-8, 12-16, 20-24, *Lupien* fails to disclose that the notifying/contacting the first user via email or telephone.

However, it would have been obvious to one having ordinary skill in the art at the time of invention was made to notify the first user via e-mail or telephone (widely available and used) in order to provides information to the buyer/seller with whether the order has been executed.

Claims 9, 17, 25, are rejected under 35 U.S.C. 103(a) as being unpatentable over *Lupien* in view of *Chater* et al. (US 5,598,351), hereinafter *Chater*.

Regarding claims 9, 17, 25, *Lupien* fails to discloses the visual images a video.

Chater, on the other hand, discloses providing video images to the user in on-line dating communication system (see col. 1 lines 24-46).

Therefore, it would have been obvious to one having ordinary skill in the art at the time of invention was made including the teaching of *Chater* especially providing the video images in the user's terminal in the system taught by *Lupien* in order to provides potential user's i.e. employer or the opposite sex in on-line dating service with ability to better screen potential employee or mate.
